

15W

DC-DC
power supplies 

Housed in a chassis mount or optional DIN rail mount package (suffix -D), with screw terminals for ease of connection, the DTJ15 take a nominal 12/24 or 24/48VDC input and convert to a fixed single voltage between 3.3 & 15VDC or dual voltage between ± 5.0 and ± 15 VDC, an LED indicator provides clear 'power good' indication.

The 15W chassis mount and DIN rail mount DC-DC converters allows for easy and convenient integration into a variety of industrial and commercial applications. Typical uses are: Communication systems; Door control; Elevator/travellator/escalator control; Fun fair/amusement/gaming systems; Process monitoring & control; Robotics; Surveillance & detection; System & safety monitoring; Telemetry & many other applications.
