

VGA over Cat5/6 Extender Kit, Wall Plate Transmitter/Receiver for Video/Audio, Up to 1000 ft. (305 m), TAA

MODEL NUMBER: **B130-101A-WP-2**

Wall plate transmitter and receiver work in tandem to extend a VGA signal via Cat5e/6 cable to a projector, monitor or television.

Description

The B130-101A-WP-2 VGA with Audio over Cat5/Cat6 Extender Kit includes transmitter and receiver wall plate units that work in tandem to extend a VGA signal to a projector, monitor or television. The kit is ideal for digital signs in schools, churches or retail applications where the video source is located farther than conventional cables allow. Attractive wall plate units eliminate cable clutter. Because compatibility issues can occur when EDID information is not properly communicated between the source and the display, the B130-101A-WP-2 includes an EDID copy feature. This enables the transmitter to store the display's EDID information and send it to the video source, ensuring top-shelf compatibility.

The B130-101A-WP-2 can extend a 1024 x 768 (60 Hz) signal up to 1000 feet (304.8 meters) and a 1920 x 1440 (60 Hz) signal up to 500 feet (152.4 meters) when using 24 AWG solid-wire Cat5e/6 cable, such as N022-01K-GY (Cat5) and N222-01K-GY (Cat6), to connect the two units. For optimal image quality between 500 and 1000 feet, use zero-skew cable, such as P524-01K. The RJ45-type wall plate jacks accept standard Cat5e/6 Ethernet cables, so no 110 punch-down connection is required.

You can also connect up to three B132-110A remote repeaters in a chain (using Cat5e/6 cable) for a total of five VGA displays (one local and four remote) and full 1024 x 768 (60 Hz) signal extension of 2000 feet (609.6 meters)

Features

Extended Display Identification Data (EDID) Copy Feature Transmitter stores monitor's EDID information and sends it to video source, ensuring optimal display compatibility. Monitor must be connected directly to transmitter's VGA port to activate EDID copy feature

Extends High-Definition VGA Video and Audio Signals Extends a 1024 x 768 (60 Hz) signal up to 1,000 ft. and a 1920 x 1440 (60 Hz) signal up to 500 ft. Connect up to three B132-110A remote repeaters to the chain for maximum 1024 x 768 (60 Hz) signal range of 2,000 ft. Transmitter and receiver connect with one Cat5e/6 cable, such as N022-01K-GY or N222-01K-GY 24 AWG solid-wire Cat5e/6 cable. No 110 punchdown connection required. For optimal image quality between 500 and 1,000 ft., use zero-skew cable, such as P524-01K

Easy to Set Up and Use Plug-and-play engineering—no software or drivers to download and install. Wall plate units eliminate cable clutter. LEDs indicate at a glance when the unit is receiving power. Included VGA + audio "Y" splitter cable allows connection of local monitor and speakers. Built-in equalization and gain controls let you adjust the image on the remote monitor. Wall-mounting screws included. Supports all

Highlights

- Stores display's EDID information and sends it to source
- Extends 1024 x 768 video and audio signal up to 1,000 ft.
- Extends 1920 x 1440 video and audio signal up to 500 ft.
- Built-in equalization and gain controls let you fine-tune image
- Plug and play—no software or drivers to install

System Requirements

Package Includes

- Transmitter wall plate unit
- Receiver wall plate unit
- VGA + audio "Y" splitter cable
- Screwdriver for adjusting equalization and gain
- (2) External Power Supplies with NEMA 1-15P Plug (Input: 100-240V, 50/60 Hz, 0.5A; Output: 5V, 2A, 5-ft. (1.52 m))
- Wall plate screws
- Owner's Manual
