Manual Starter and Protector

Push button control

Operation is controlled manually by the **Start button (I)** and **De-energization** by **Stop button (O)** or automatically by the thermal-magnetic protection elements.

Protection

The magnetic elements (short-circuit protection) have a non-adjustable tripping threshold, which is equal to about 13 times the maximum setting current of the thermal trips.

Connection

These Manual motor controllers are designed for connection by screw clamp terminals. Each connection can take two independent conductors.
