

AD841JN Operational Amplifier IC - Datasheet

The AD841JN is a high-speed, wideband operational amplifier designed for precision signal processing applications. It offers excellent AC and DC performance, high slew rate, and wide bandwidth.

Parameter	Specification
IC Type	Operational Amplifier
Package	DIP-14
Supply Voltage	$\pm 5\text{V}$ to $\pm 15\text{V}$
Bandwidth	40 MHz
Slew Rate	300 V/ μs
Settling Time	110 ns
Operating Temp	0°C to 70°C
